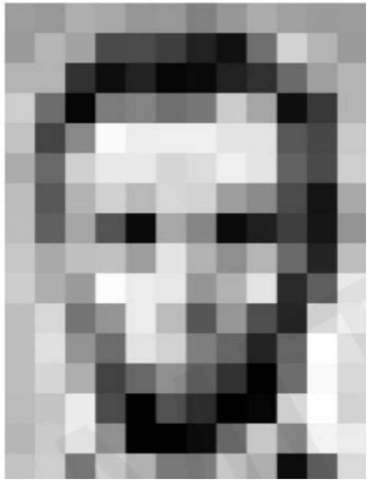
Introduction to Vision Models

CNN, VIT AND BEYOND…!

What is an image?



How computers sees an image?

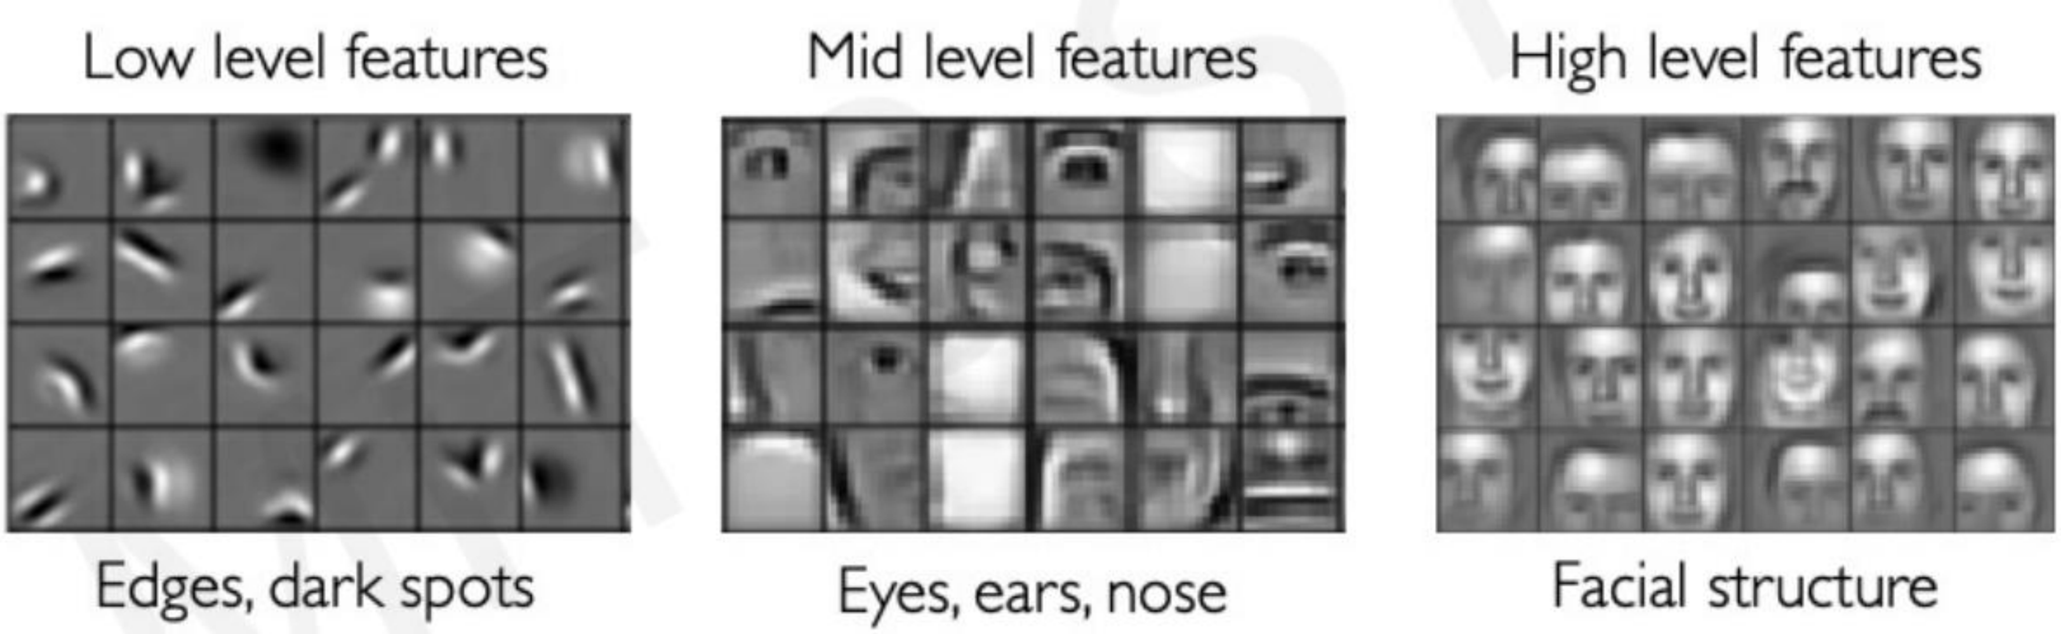
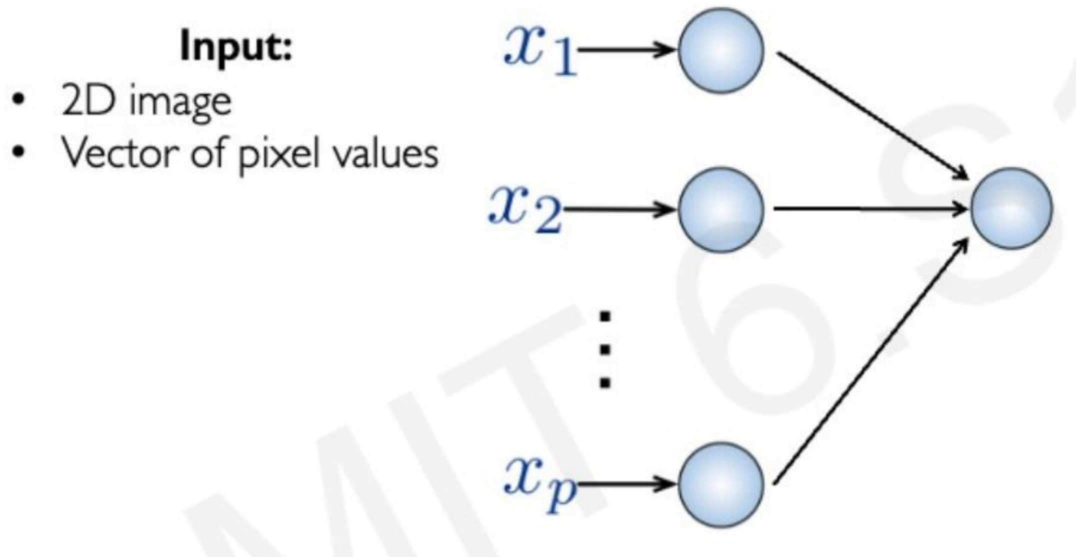
Local features within images?



How to process such data with NN?

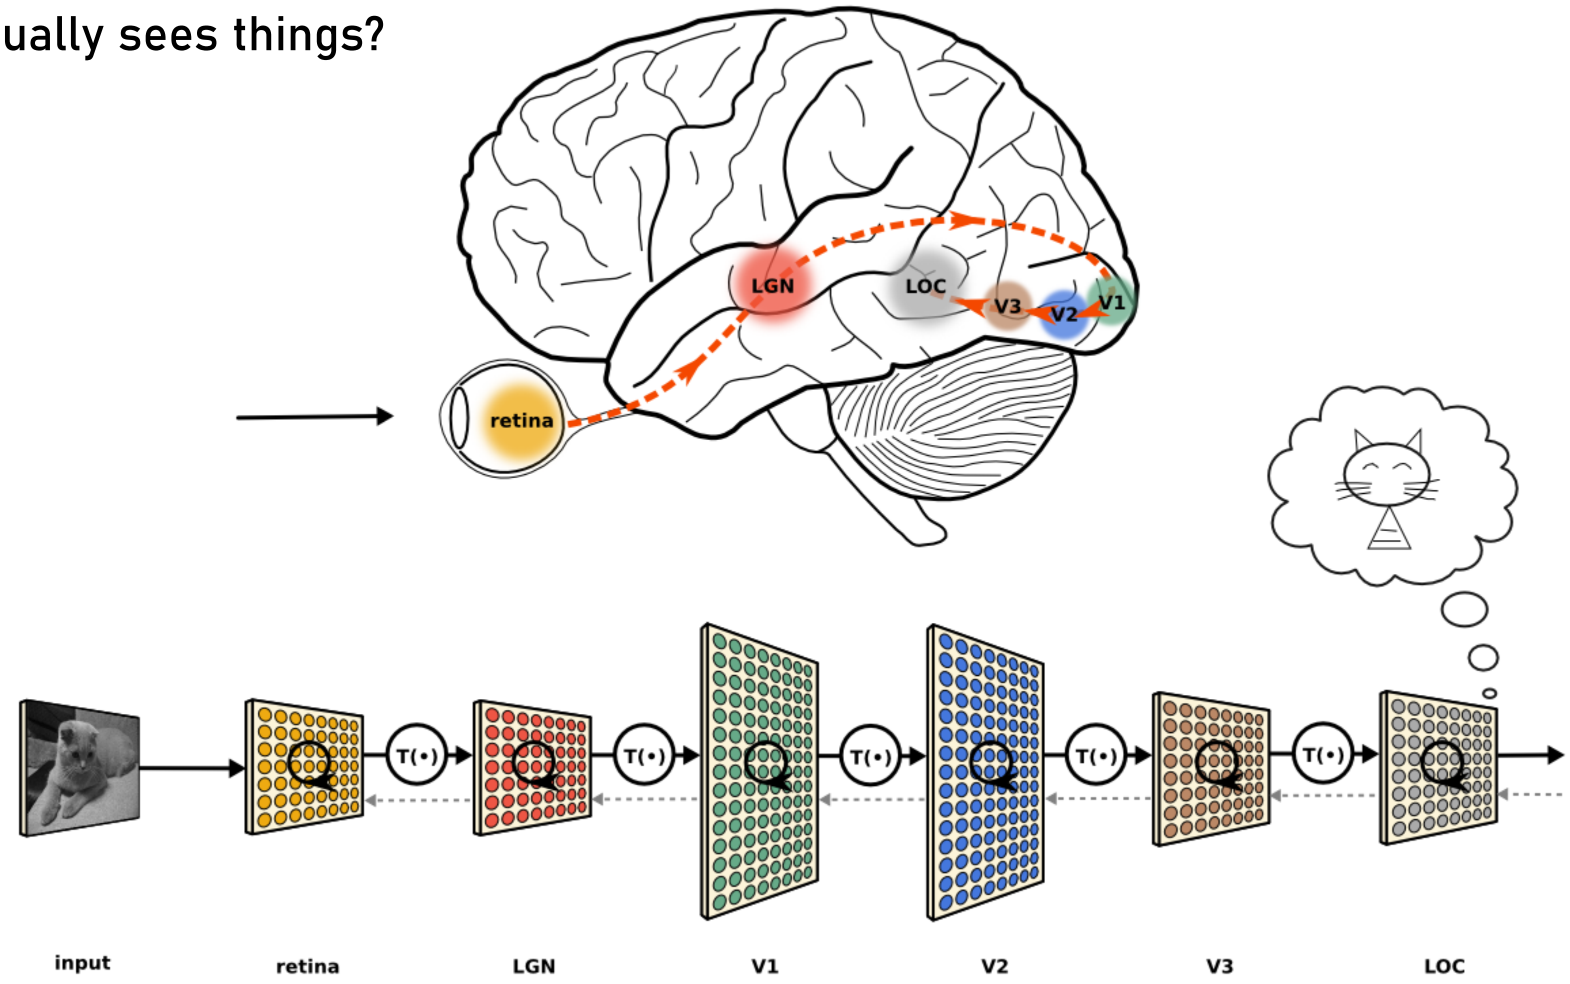


Input:

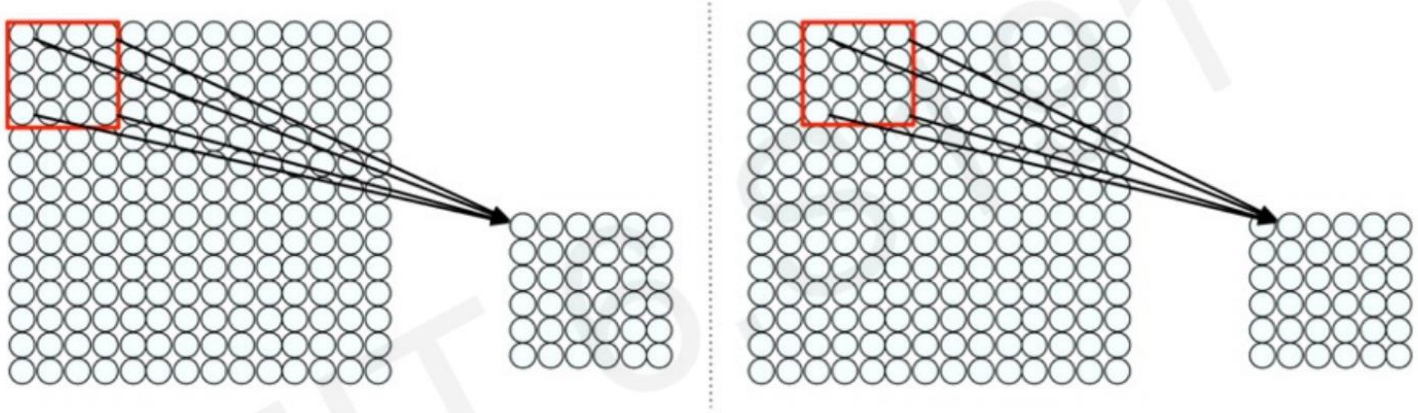
- 2D image
- Vector of pixel values

But this is not how our brain Sees!

How Brain actually sees things?



Getting spatial views with filters!



Connect patch in input layer to a single neuron in subsequent layer.
Use a sliding window to define connections.
